

Installation

ENAiK00N locate-06 with ENAiK00N driver-id and buzzer

Straightforward installation:

- Just connect the ENAiK00N locate-06 to VCC and the DigIn 4 to Ignition,
 - attach the GSM/GPS antenna to the related connectors and mount the antenna,
 - pass the 1-Wire cable of ENAiK00N driver-id reader and affix it,
 - pass the black cable of the ENAiK00N buzzer to DigOut 2 and the red cable to VCC.
- That's all.

- Remove protective foil (white)
- Stick it to the windscreen from inside the vehicle
- Do not bend or fold up the antenna cable

Please mount the antenna connectors hand tight only!

Please ensure, that there is no material between the GSM/GPS windscreen antenna and the sky that might interfere with the radio transmission, especially metal, water, metallic evaporated windscreen or metallic varnished plastic parts.

Please ensure a minimum distance of 1 meter (1 yd) to other antennas mounted to the vehicle (radio antenna, toll collect antenna, car phone antenna etc.), as well as a minimum distance of 7 cm (2.8 in) to the frame of the front shield.
